# MOKKO

They define style and add character. Forget about cheap trinkets, it's time for nobility of black and white satin. Let a note of extravagance enter your home.

2. ADM A54K

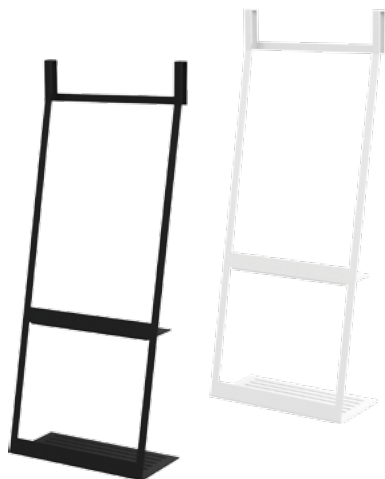

### Shower cabin shelf, type B

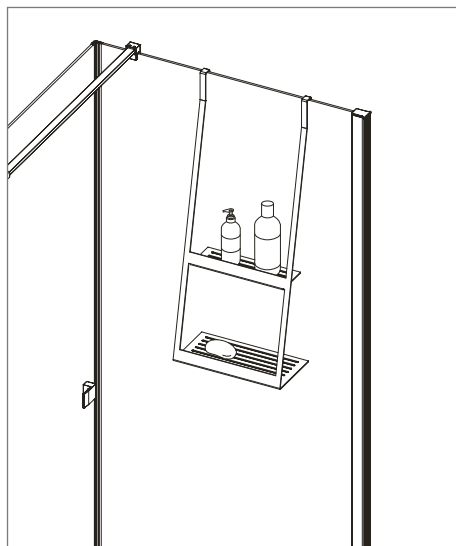

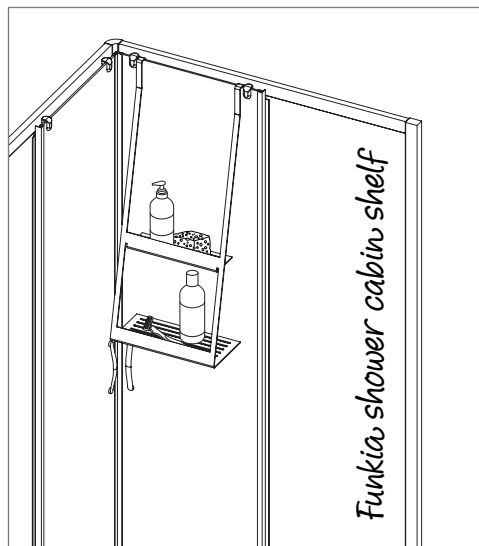

dimensions: 300 x 141 x 762 mm

ADM N53K - NERO

ADM A53K - BIANCO

Shower cabin shelves include silicon protection pads in the set, max thickness of the cabin can be 11 mm, to be mounted on the moveable glass parts of the Funkia cabin, fixed glass walls of a cabin and walk-in type cabins.

The Mokko shower shelf is a great example of a well-thought-out, responsible design, with a visually interesting style. The shelf has plenty of space for care products and is easy to clean. It is a great combination of design and practicality. Contrary to the other models, the type B shelf can be also mounted on the moveable glass of a shower cabin.

3x magnification

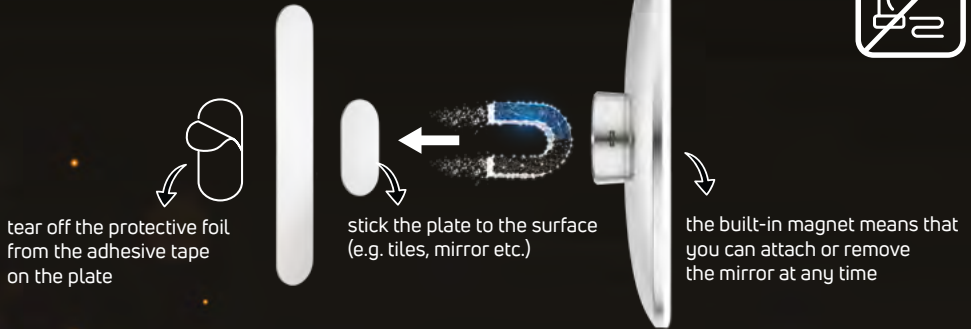

daylight color – white light  
with a color temperature of 6500K

warm light with a color  
temperature of 2700K

switch on by touch  
or hand gesture

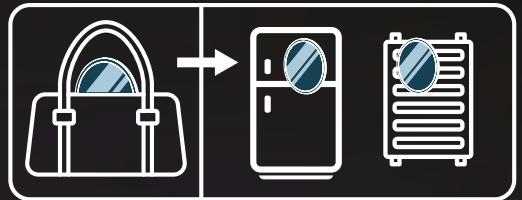

## EASY TO MOUNT

The plates can be attached to a smooth surface without the use of additional tools and in any chosen configuration: horizontally or vertically. The plates can be attached in 2 different rooms and the mirror can be moved wherever it will be used.

The mirror can be removed from the plate at any time and taken with you on a trip. It can then be attached to any other magnetic surface.

## CHARGING

- the LED light can operate without connection to a power outlet, because it is charged via USB
- the built-in battery lasts 4-6 weeks (when used for about 10 minutes a day)

Towel rail with two suction cups  
dimensions 480 x 60 x 55 mm

ANH 005K - CHROME

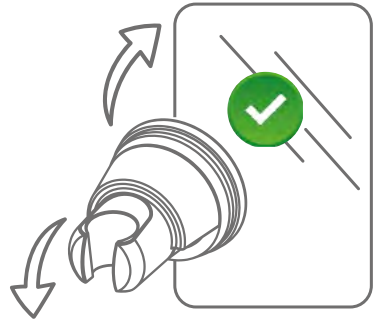

holds thanks to adhesive forces and underpressure

reusable at any time

no tools required

- easy to attach without damaging the surface
- simple removal without leaving permanent traces

To prepare the surface for installing suction pads, we recommend using glass cleaner, vinegar, citric acid or dishwashing liquid. Make sure the contact surfaces are dry before attaching the suction pad. If the suction pad keeps coming off, the surface is not smooth enough.
